We claim:

- An isolated DNA consisting of a nucleotide sequence encoding for a polypeptide which comprises an amino acid sequence of No. 175 to 319 of that shown in SEO ID No: 2.
- An isolated DNA which comprises a nucleotide sequence of base
  No. 765 to 1199 of that shown in SEO ID NO: 1.
- 3. An expression vector, which comprises a DNA of any one of  $\cdot$  claims 1 or 2.
- 4. An expression vector, which comprises a DNA of any one of claims 1 or 2 and which further comprises a DNA, which consists of a nucleotide sequence encoding for non-Fas peptide sequence.
- 5. The expression vector of claim 3, which further comprises a promoter derived from peptide chain elongation factor  $1\alpha$  (EF1  $\alpha$ ).
- 6. The expression vector of claim 4, which further comprises a promoter derived from peptide chain elongation factor  $1\alpha$  (EF1  $\alpha$ ).
- An isolated cell transformed by an expression vector of claim 3.

- 8. An isolated cell transformed by an expression vector of claim 4.
- 9. An isolated cell transformed by an expression vector of claim 5.
- 10. A method of producing a polypeptide comprising an amino acid sequence of No. 175 to 319, which comprises culturing a cell of claim 6.
- 11. A method of producing an antibody recognizing a polypeptide comprising an amino acid sequence of No. 175 to 319, which comprises utilizing as an antigen a cell of claim 6 or a polypeptide produced by the method of claim 7.
